# About Us

**Build Higher** - Elevating Your Brand with Unmatched Quality  
At Build Higher, we are committed to excellence in the industry of customized branding solutions. Our cornerstone is the use of the highest quality European French paper, renowned for its superior characteristics and performance.

Additionally, we incorporate flax seeds, also known as rice paper, to ensure the highest quality paper for our products. We understand the crucial role of a slow, even burn in your products, and how the right quality can make all the difference in delivering a premium experience.

Beyond our material selection, we are proud to operate a GMP (Good Manufacturing Practice) certified facility. This certification reflects our commitment to quality and safety in every aspect of our production. We use no harmful additives and maintain a pesticide-free manufacturing environment, ensuring the purest and safest products for our customers

## Trusted by Industry Leaders

Our commitment to quality has earned the trust of prominent names in the industry such as Cookies, Jungle Boys, Bodega Boyz, Alien Labs, Connected, Lemonade, and Backpack Boyz. We are honored to serve these and many other esteemed clients, helping them elevate their brands

ultimate smoking experience,  
no more soggy paper crutches

## Glass cones (pages 12-13)

Reusable lab-grade glass tip for the  
ultimate smoking experience,  
no more soggy paper crutches

# PAPER VARIETIES

## European Papers

Bleached

Our bleached rolling paper is made from ultra-thin, practically transparent, European paper that burns smoothly and evenly. Being chemical free and tasteless, this allows the user to see the flower, and relish its original taste. This type also provides for high visibility of your custom branding on the filter tip.

Pink

Our pink colored papers stand up for your requirements like our bleached and unbleached offerings, this type is also completely natural with the pink tinge coming from natural colors. With contrasting artwork, these papers also convey your brand and associated messages. Unlike colored offerings from other companies, we DO NOT compromise quality for color.

Unbleached

To give a natural look to your cones without compromising on the visibility of your artwork. For this paper, we recommend using bold colors for your artwork to maintain strong contrast. These are made from wood pulp of European origin. These papers are thin, partially transparent and burn smoothly and evenly.

Blue

Without compromising on our sourcing and commitment of papers being 100% natural, we come up with an array of colors to convey messages or align with your brand identity. Blue signifies relaxation and calmness, an important feature of our industry.

Organic

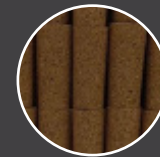

Our hemp papers are 100% organic providing a sturdy feel and mild flavor. Custom branding for cones using hemp paper requires bold fonts and bright colors as this is comparatively less transparent. These paper cones are made of pure hemp fibers sourced sustainably that helps conserve trees and ecosystems. Burning evenly, the smoking experience is superior.

Green

Green is a popular color for cones, as it signifies natural origins and purity. The best part about bringing the amazing green tinge is that no additional dyes are used. The wood pulp used is of plants slightly earlier in the lifecycle than that of other variants. Add this offering to your customers as they go green!

## Hemp Papers

Brown

Less processed than white counterparts and sourced from later stages of wood pulp, our brown blunt cones offer elevated natural flavor without THC or tobacco. The custom branding artwork be of bright colors for better visibility.

Green

These cones provide a THC & tobacco free smooth smoking experience; allowing the flavor of hemp and flower to stand out. These papers are slightly thicker, offer slow and even burn. Ideal for consumers, who want an even but diluted smoking experience, these cones are a mandatory offering by your business.

# CUSTOM BRANDING

Our custom branded cones are designed to give your brand identity an elevation. We ensure your brand is prominently and cohesively displayed on all the cones that we supply to you. Never compromise on your business and customer loyalty by selling someone else's brand. We also provide strategic inputs from our professional team to help you launch and scale your brand.

Filter Tip Branding (Inner)

We have a variety of filter tips enabling you to select the one most suitable for your needs. Depending on the artwork of your brand, we can offer the texture and positioning that suits your desired visibility levels.

Filter Tip Branding (Outer)

The outer side of the filter tip is the most prominent place to display your Logo. As it is quite visible, we incorporate your branding input in our manufacturing process to provide customized printing solutions on the filter tip.

Cigar Bands

Accessories have been the time-tested way to enhance experience and prominent display of brand identity. Enduring visibility along with additional revenue is why accessories should always be a part of your offerings.

# Frequently Asked Questions (FAQs)

## Q: What types of paper do you offer?

A: We offer four distinct types of paper: White, Hemp, Brown, and Blunt Cones, each chosen for its unique properties and quality.

## Q: Can you customize the size of the cones?

A: Absolutely! Customization is our specialty. We can tailor-make cones in any size to suit your specific needs.

## Q: What is your turnaround time for orders?

A: We pride ourselves on our quick turnaround time. The exact time frame may vary depending on the specifics of your order, but we always strive to meet your needs promptly.

## Q: Do you only specialize in paper products?

A: While paper products are a significant part of our offerings, we also specialize in glass, stickers, and ceramic options to provide a comprehensive branding solution.

## Q: How do our cones work with automation machines?

A: Our cones are designed to be compatible with most automation machines, ensuring seamless integration into your existing production processes.

## Q: How are your cones packaged for shipping?

A: All our cones come in towers for easy shipping. Towers with 800 pcs are for sizes 98mm and above, while towers with 900 pcs cater to sizes 98mm and smaller.

## Q: What shipping options do you provide?

A: We offer a combination of air and sea shipping to best suit your needs. This approach allows us to quickly deliver enough product for immediate production via air shipping, while the remainder of the order arrives via sea shipping to help reduce costs. Additionally, we ship worldwide, accommodating international orders and ensuring global reach.

## Q: Do you offer unbranded products for immediate needs?

A: Yes, we provide unbranded, ready-to-go blank cones for your immediate needs, complete with fast shipping to ensure timely delivery.

## Q: How do I start an order with Build Higher?

A: To start an order or to learn more about our services, please [provide contact method – e.g., a contact form, email address, or phone number].
